ABSTRACT

ScroogeCoin cryptocurrency is a fork of EvergrowCoin which rewards its users in \$BUSD, a Crypto Pegged one-to-one with the USD. This single feature is so important that it makes ScroogeCoin a front runner among all the cryptocurrencies.

With every transaction, a small percentage of tokens are automatically transferred to the PancakeSwap liquidity Pool. ScroogeCoin also maintains a buy-back reserve from where the tokens are converted into BNB and securely locked and stored in the ScroogeCoin contract. The MoonShot buyback and AutoBoost buyback systems work to maintain the smooth flow.

The desire of ScroogeCoin is to create a new distribution of wealth back to the people holding the digital property instead of flowing into corporate entities. We believe that the reflection token is a trillion-dollar market. We want to be the #1 coin and community in this market.

SCROOGE COIN CODE

On the Binance Smart Chain (BSC), ScroogeCoin is the next generation of the reflection token: the Binance Pegged BUSD reflection token to ensure value in the community coin.

Simply by holding \$SCOOGE tokens, users will receive 8 percent in Binance Pegged BUSD for each transaction, which will automatically be transferred to the wallet every 60 minutes. ScroogeCoin has a total supply of 1,000,000,000,000,000

Token. 8% BUSD will go to all holders. The amount one receives will be determined by how much SCROOGE the holder has.

Out of the total SCROOGE coins, 50% of tokens are sent to the burn address, 10% to the founders and the team, and finally, one hundred trillion coins are in the marketing address. As the coin increases in value these coins will be destroyed further increasing the burn.

- **8% of every buy/sell is redistributed to all holders IN Binance Pegged BUSD, which is auto paid every 60 Minutes**
- **2% of every transaction is transferred into Liquidity Pool for Pancakeswap to create a stable price floor**
- **4% of every transaction is transferred into Smart Contract for Marketing. No coins inside the marketing contract will ever be sold. They will be burned. As the coin increases in awareness to the community the team can decide to utilize some of the marketing expense as a burn instead of marketing.**

OUR CORE VALUES

- ***Transparency***

On the Binance Smart Chain (BSC), ScroogeCoin is the next generation of the reflection token: the first Binance Pegged BUSD reflection token to optimize user's profits both now and in the future. Simply by holding \$SCROOGE tokens, users will receive an 8 percent return in Binance Pegged BUSD for each transaction, which

will automatically be transferred to the wallet every 60 minutes. The amount of BUSD will be determined by how much of the coin you HOLD.

- ***Trust***

Trust is critical in the bitcoin industry. This entails complete openness in all aspects of community and development work, as well as security efforts. ScroogeCoin has completed its security audit successfully. The inclusion of Binance Pegged BUSD brings more trust to its users. There will NEVER BE A RUG PULL WITH SCROOGE COIN.

- ***Community***

ScroogeCoin will be one of the fastest growing and most beloved communities in cryptocurrency. We believe that community is essential, and ScroogeCoin tries to involve people from all around the world. We will soon offer specialized telegram channels for our foreign community.

- ***Longevity***

ScroogeCoin is here to stay. The decentralized community encourages and embraces long term ecosystem and foundation development to generate genuine use cases and higher benefits than any ephemeral fad.

SCROOGE ECOSYSTEM

BUSD Reflection

Earn automatic Binance pegged BUSD rewards by holding your \$Scrooge Coin – 8% of every buy and sell transaction is automatically redistributed to all token holders. You will receive the rewards automatically in your wallet or claim them manually in our dApp Dashboard. This effectively means that the native reflection of Scrooge Coin works in parallel with Stable Yield, generating a Compound Reflection effect and exponentially

increasing your holdings. The opportunity to receive passive income from holding Scrooge Coin is limitless.

Marketing

4% of every buy and sell transaction is automatically added to Marketing. The tokens collected from the fees are converted into BNB and securely locked and stored in the Scrooge Coin contract. The contract is coded so that the BNB in the marketing contract will be utilized as marketing expenses OR to purchase Scrooge Coin and burn. We are very serious about marketing efforts to further grow the community of the coin. The reason for the coins in the marketing pool initially is to increase the marketing efforts for holders drastically in the beginning.

Liquidity Pool

2% of every transaction is converted into liquidity for PancakeSwap. Pancakeswap fixes the low liquidity problems of DEXs through the liquidity Pool mechanism. A liquidity pool always contains a pair of tokens, which you can trade. Our Smart contract deposits 2% from every buy/sell transaction as \$SROOGE Coin and \$BNB into a liquidity pool.

LaunchSale

There will be an initial LaunchSale. This LaunchSale will be extremely limited. There will be a soft cap of 150 BNB and hard cap of 300 BNB. All who participate in this sale will get exclusive NFT's of Scrooge Coin when we launch the gaming platform. You will also be part of the beta test so that prior to full launch you will get to experience the gaming platform FIRST. The exclusive NFT's will only be distributed to the initial holders and NO one else will be able to copy or receive them. Inside the Scrooge economy no one will be able to access our gaming platform without being a holder. Scrooge will be the currency within our ecosystem. The LaunchSale will provide liquidity for our coin indefinitely.

CASINO GAMING

MECHANICS

As far as the casino our goal is to have a beta live and operational within 90-120 days. We are already in talks with game developers and trying to narrow down who we work with. The casino will be tied to the marketing wallet. With 100 trillion coins inside the wallet BUSD and BNB marketing dollars will flood this wallet. BNB will be used entirely for marketing SCROOGE and the BUSD will be used to build the casino and FUND it. All holders of SCROOGE will be able to enter the casino. We plan on utilizing a wallet connect system where you connect your wallet to SCROOGE casino and are given a specific number of tickets monthly depending on your holdings. We genuinely believe the casino will be funded with MILLIONS of dollars within months of launch. Initially it will have Texas HoldEm Poker and Slots with many more games to come. The benefit you can enter and WIN BIG for HOLDING SCROOGE. See you inside the casino friends.

CONCLUSION

ScroogeCoin is not the only BUSD reflection coin on the market. There are others like EverGrow Coin and SafeMoon. However, ScroogeCoin is the **ONLY** new coin in which you can be certain there will never be a rug pull. This coin was birthed because of a desire for passive income. Never in human history has there been something that can create wealth for us like these tokenomics. The end goal is to be dominant in both the crypto and gaming platforms which we believe is the future economy of the world. More likely than not the metaverse will be closer to reality than actual reality. We must gain our space in the coming ecosystem. Please remember SCROOGE is not a business so there are no profits from said business like a corporation. The value of SCROOGE will solely be determined by the community that holds them.
